

SKIN PREPARATION

Moyle Mink & Tannery

Be sure skins are thoroughly fleshed and salt dried before shipping. (Furbearers for intact fur dressing may be sent trapper dried.)
WE DO NOT ACCEPT FRESH OR FROZEN SKINS. Do not forget to split and dry the tail!

Skins must be completely dry upon receipt or you risk spoilage. Damp salted hides will spoil in storage or shipping.

Taxidermy specimens must have all lips and ears turned, tails split, and paws fleshed out.

Dry all capes and mounts with the ears folded down toward the center of the cape. This will help prevent them from being damaged during shipping.

Remove all unnecessary tags once you have punch marked your hides for identification.

Fold all skins into pieces smaller than 4 ft. x 4 ft. or they will not fit in our storage bins.
